

Q: WHAT IS CELLENIS DERMA PRP?

A: Cellenis Derma PRP is made from your own blood and supports skin revitalization in your dermal architecture to enhance the youthful appearance of the skin. Cellenis Derma PRP provides a natural volumizing effect.

Q: WHAT DOES CELLENIS DERMA PRP DO?

A: Cellenis Derma PRP creates a natural scaffolding to support soft tissue in your skin. It contains all the benefits of platelet-rich-plasma (PRP) which is rich in proteins and growth factors. Cellenis Derma PRP has an extended reabsorption rate which releases proteins and growth factors into the treatment area over a period of time. Cellenis Derma PRP provides immediate volume with long-term dermal health benefits.

Q: WHAT IS PRP?

A: Platelet-rich-plasma, PRP, is a natural treatment that is derived from your blood. Plasma is the liquid component of your blood that allows your cells to flow through your blood vessels and is rich in proteins and growth factors. Studies show that the increased concentration of growth factors in platelet-rich plasma may stimulate the body's own properties to induce healing and tissue regeneration. (1)

Q: HOW IS CELLENIS DERMA PRP MADE?

A new cosmetic technique, Cellenis Derma PRP is harvested from your own blood through an easy and simple procedure. A small blood sample is collected from you by your provider. The unique, patented, and proprietary process allows the proteins in the blood to be restructured in a more densely organized scaffolding network to help support soft tissue and provide an immediate volumizing effect.

Q: WHAT IS THE CELLENIS DERMA PRP TREATMENT LIKE?

A: Numbing may be required and topical anesthesia can be applied prior to beginning the treatment. Once the Cellenis Derma PRP is prepared from your own blood, you might experience tenderness in the treatment area. The most common side effects are transient and include redness, mild to moderate swelling and possible bruising. The treatment takes about ~30 minutes depending on how many areas your provider is treating.

Q: HOW MANY TREATMENTS ARE REQUIRED?

A: The number of treatments is dependent on individual goals. This is a customized procedure and typically 2-3 treatments are required. Your providers will discuss your individual concerns and goals to recommend a treatment plan specifically customized for you.

FDA CLEARANCE: CELLENIS PRP IS DESIGNED TO BE USED FOR THE SAFE AND RAPID PREPARATION OF AUTOLOGOUS PLATELET-RICH-PLASMA (PRP) FROM A SMALL SAMPLE OF PERIPHERAL BLOOD AT THE PATIENT POINT OF CARE. THE PRP IS MIXED WITH AUTOGRAFT AND/OR ALLOGRAFT BONE PRIOR TO APPLICATION TO A BONY DEFECT FOR IMPROVING HANDLING CHARACTERISTICS.
